Selected Projects

Sports Management System

Academic Project | PHP, MySQL, HTML, CSS, JavaScript A web-based system for managing sports activities, including teams, players, events, and results. I worked on user authentication, backend handling, form validation, and MySQL database integration. The system includes administrator and ordinary-user roles, with event scheduling and registration workflows.

Personal Portfolio Website

React, HTML, CSS, JavaScript, Netlify, GitHub A personal website presenting my background, interests, projects, and learning achievements. Work includes refining the interface, organizing project and certificate sections, managing code with GitHub, and deploying updates through Netlify.

C-Based Web Server

A foundational project exploring a simple server, client communication, and the client-server model in C.

Education

BSc in Computer Science (Undergraduate)

2026

university of colombo

University of Colombo School of Computing (UCSC), University of Colombo, Sri Lanka Currently pursuing a degree in Computer Science. Relevant coursework includes Data Structures and Algorithms, Database Management Systems, and Object-Oriented Programming.
